About Me

Senior Frontend Software Developer with 10 years of experience building scalable, high-performance web applications, specializing in React, TypeScript, responsive UI development, and frontend performance optimization.

Experience

- Feb 2024 - August 2026

Amlak International • 2+ years

Led the frontend architecture and project setup for Amlak’s employee financing system, establishing a scalable, maintainable foundation and delivering key features supporting core financing workflows.
- Sept 2021 - Feb 2024

Swoop Aero • 2+ years

Played a key role in launching a pilot portal for drone flight management, contributing to a multi-user, real-time monitoring platform and applying frontend engineering expertise within the specialized aerospace industry.
- July 2021 - Sept 2021

Reps & Co. • 2 months

I contributed to the development of a platform that allows users to create and manage event tickets, providing a seamless experience for both event organizers and customers.
- Apr 2020 - June 2021

Viyahe Inc. • 1+ years

Enhanced and optimized Viyahe’s flight booking platform for travel agents, driving improvements in performance, reliability, and user experience while delivering key feature enhancements to support efficient booking workflows.
- Sept 2016 - March 2020

Invento Software Solution • 3+ years

Software Developer specializing in frontend development, building scalable web and mobile applications with ReactJS while creating reusable architectures, boilerplates, design patterns, and optimized, well-tested solutions that improve both system performance and user experience.
